Subject: Submission of Final Report

Respected Madam,

I joined the esteemed National Commission For Protection Of Child Rights as an intern on 23rd August 2013. I was lucky enough to have the esteemed membership of Dr. Vandana Prasad. I was overawed with her vision, rich experience and expertise in varied fields and especially with regard to Protection of Child Rights. The journey of my internship, thereon has been quite a learning experience. I not only gained in the subject matter but also delved confidence for eradication of illiteracy and provide Free and Compulsory Education for All Children in age group 6-14 years in a neighborhood school, under her able guidance and supervision. This one month in the commission has been really an experience which will help me a lot to improve the society in the future.

I was given an opportunity to have an overview of the complaint file of RTE; it gave me insight in understanding the perception and working of the commission as also understanding the manner in which the children in the country are facing these kind of problems e.g. (denial of admission in school, reservation in private schools for children from economically and socially disadvantage groups of society etc). Analyze the ATRs in terms of the variation between the instruction issued by the Commission and actions taken. It constituted the major learning in my entire as an intern as it gave me a sneak peek into the working of the Commission. It also provided me an opportunity to understand the hierarchy, purpose, functioning and direction of the commission.

Working under the stewardship of Ms. Radhika Alkazi (STE, Health) Ms. Ritu Narang (STE, Education) was an amazing experience. They were very supportive, patient and helpful in clearing all auras of my doubts during the course of my internship in the commission.

During initial stage of internship, I got an opportunity to provide inputs on the study of 'Education of Migrating Children' and assist in preparing Concept Note that very important issue, because most of these Migrated Children are educationally and socially excluded from mainstream of Society.

Later period of internship, I got an opportunity to assist Ms. Radhika Alkazi (STE, Health) for the consultation session on RTE and Right of children with Disabilities to Inclusive Education, dated 5th September 2013. I also assisted her in maintaining the list of Panel members/invitees and calling them up, taking their confirmation to ensure their participation in the meeting organized by the commission on School Audit. It appeared to be very normal job, but required full involvement understanding

decision taking and inculcating in one the leadership qualities. This meeting helped in latent learning in the form of helping me realize the crucial role played by Commission and stakeholder that could insure the accountability and responsibilities of Schools/SMCs. I learnt organizing, managing, disciplinary and time management skills to know how an meeting of such a scale and magnitude is taken care of. I observed the decorum and the manner in which the whole procedure is carried out of formulating the Questionnaire for School Audit. I am grateful to Ms. Radhika Alkazi and Ms. Ritu Narang for guiding me diligently at every stage of the internship.

In the period of whole internship I worked with Ms. Smita Panday (TE), Mr. Rajnikant (TE), Ms. Sonal Jain (JTE), Ms. Shikha (JTE) and in the commission. It was a great experience working with them and each of them assist me a lot to improve my knowledge. Along with above work I also attained/ participated in the meeting regarding Child health issue e.g. on malnutrition presented by Dr. Vandana Prasad (Member). The presentation was very nice and defiantly it boosted my knowledge regarding Health and Malnutrition.

Work culture in the Commission is one learn from. As per my observation, hierarchy does not hinder communication in the office. There is no sense of complacency among the staff members which facilitates smooth communication and an ambience of bonhomie prevails. Differences, if any, are sorted out in the most amicable manner.

I would like to extend my heartfelt gratitude to Dr. Vandana Prasad, Administrative staff and other staff members of the Commission for their contribution in enhancing my knowledge, perception development attitude towards understanding aims, objectives and functioning of the NCPCR.

At the end, in the tenure of one month internship with NCPCR. I have developed a rapport with the commission and its people and hope to continue my allegiance to the Commission in future if given an opportunity.
